Highlights

360-degree sound pick-up

Sound pick-up from a 360-degree radius for a perfect recording experience. Meetings can be easily captured.

DSS Pro, PCM and MP3 recording

The DSS format was developed for use in digital voice recorders, permitting a high compression ratio with little loss of quality while enabling you to store additional information in the file header. The PCM format allows stereo recording in CD-like audio quality and the MP3 format is the common audio format for consumer audio storage, as well as a de facto standard encoding for the transfer and playback on digital audio players.

Extendable solution

Easily extend the recording range of your PocketMemo Meeting Recorder by simply connecting up to six meeting microphones.

Innovative meeting microphones

The innovative boundary layer design of the included meeting microphones uses the sound pressure of the table to provide excellent sound and recording quality with a 360 degree sound pickup radius.

Wire storage

The built-in wire storage in the 360° microphones allows you to adjust the length of the cable to perfectly suit your needs, making sure your desk always looks tidy and professional.

Elegant metal carrying case

The elegant metal carrying case guarantees highest mobility and safe transportation.

SpeechExec software

The SpeechExec software organizes the workflow of dictation files and resulting documents between author and transcriptionist and allows you to monitor the status of your work.

Out-of-the-box solution

The PocketMemo Meeting Recorder delivers excellent sound quality combined with easy-to-use technology right out of the box.

Exchangeable memory card

Virtually unlimited recording capacity thanks to an exchangeable memory card.

Highlights

Automatic download via USB

When plugged in, the PocketMemo Voice Recorder automatically downloads your audio files directly onto the computer.
